

Full Presentation Title

Second Title Line If Needed

Presenter Name
Supervisor: Supervisor Name

- 1 Basic Content
- 2 Structured Slides
- 3 Special Frames

Standard Block

Use the usual Beamer environments. The first-level item marker is a small hollow circle.

- First point with a concise statement.
- Second point with a short explanation.
- Third point with a displayed equation:

$$\min_{x \in \mathbb{R}^d} f(x) + g(Bx).$$

Alert Block

Use alert blocks for assumptions, warnings, or key conditions.

Left Column

- Model setup.
- Main assumptions.
- Notation.

Right Column

$$\mathbb{E}\|x_k - x^*\|^2 \leq C\rho^k.$$

This block is useful for conclusions or examples.

Item	Description	Remark
Method A	Deterministic baseline	Stable
Method B	Stochastic variant	Scalable
Method C	Accelerated method	Fast

Replace this TikZ placeholder with
`\includegraphics[width=...]{file-name}`

Theorem

Assume that f is convex and L -smooth. Then a suitable first-order method satisfies

$$F(x_k) - F(x^\star) \leq \mathcal{O}\left(\frac{1}{k}\right).$$

Proof.

State only the main proof idea on slides; keep technical details in backup pages. □

This frame intentionally has no header and no footer.

Use it for full-page figures, section breaks, or special transition pages.

The custom `hitfullframe` environment is a shortcut for a plain full-content frame.

- The normal header, footer, and page number return automatically.
- Use standard frame environments for most slides.

This slide keeps the template style, but it is not included in the total frame count.

Displayed page numbers remain like 1/20, 2/20, ..., 20/20.

This backup slide has no header/footer and is also not counted.
